

## COMP4513 React 1 Lab Instructions

I have (at least) two separate React labs. The files and instructions are in the book's official labs (<https://funwebdev3rd.gumroad.com/l/lab-set-one>). The first lab is Lab 11a: Beginning React, which is 34 pages with 14 exercises. While these step-by-step exercises (and the test-your-knowledges) aren't marked, I do think they will help you learn React in a more hands-on manner.

What I will be marking is Project 1 of Chapter 11. You can find the files and the relevant pages from the book at:

<https://github.com/mru-comp4513-archive/comp4513-w2023-react1>

You can download the starting files as a zip or use git to clone the repo.

I would aim to finish this lab by Feb 6-10 (or even earlier).
